

Syed Muhammad Mudassir

✉ mudassirfrance@gmail.com ☎ 0751-066495 📍 Paris, france 🌐 mudassir linkedin

👤 Profile

MSc student in Biometrics & Intelligent Vision with expertise in AI research, machine learning, and data analysis. Currently working on developing synthetic face generation systems using Stable Diffusion XL and LoRA. Demonstrated experience in database development, Python programming, and data visualization. Actively seeking an AI/ML internship to apply and expand my technical skills.

🎓 EDUCATION

Master Optics, Image, Vision, Multimedia International biometrics and intelligent vision

2024 – Present | Créteil, France
Université Paris-Est Créteil (UPEC)

BS in Software Engineering

2018 – 2022 | Karachi, Pakistan
Sir Syed University of Engineering & Technology

💻 SKILLS

Programming Language

Python, Java, JavaScript, C, C++, SQL, Microsoft SQL Server, MySQL, Oracle

Data Analysis

MS Excel, Python, Excel Pivot Tables, SQL

Data visualization

Tableau, Power BI

Web Development

HTML, CSS, Bootstrap, WordPress

💼 PROFESSIONAL EXPERIENCE

Database Developer Intern, Naveena Group

01/2021 – 02/2021 | Karachi, Pakistan

- Proficiently wrote complex Oracle queries to retrieve data efficiently, contributing to streamlined report generation.
- Designed and developed user-friendly forms that enhanced data entry and retrieval processes, improving overall efficiency.

Version Control & Documetation

Git, GitHub, LaTeX

AI tools

ChatGPT, LLMs and other AI tools

IDE & Code Editor

VS Code, Sublime, PyCharm, Jupyter Notebook

Miscellaneous

MS Office, UML Diagram, ERD, EERD, Use Case, Data Modeling, Database Design, Linux, Kali Linux, Virtual Box, Photoshop Editing, Video Editing, Internet Searching

📁 PROJECTS

Synthetic Face Generation for Drug Abuse Detection - UPEC

06/2025 – Present

- Co-developed an AI system using BLIP, CLIP, and OpenCV for generating intelligent prompts from images.
- Technologies used include Python, BLIP, CLIP, OpenCV, LoRA, JSON, and SDXL.
- Organized prompts and metadata in JSON format for model training purposes.

Environmental Data Processing Project

09/2024 – 01/2025

- Built a system to analyze air quality and Sentinel-2 imagery using MySQL, FFT, and image processing for pollution detection via GUI.

AI Virtual Assistant Project

05/2021 – 02/2022

- Created a Python-based AI virtual assistant, demonstrating expertise in AI.

Data Visualization Projects using Tableau

01/2022 – 01/2022

- Analyzed datasets and created informative Tableau dashboards for data-driven insights.

🏆 Awards

Presidential Appreciation – Aurora Annual Conference | Université Paris-Est Créteil (UPEC)

01/01/2025

Awarded official recognition by the University President for exceptional commitment and contribution to the success of the Aurora Annual Conference.

Aurora Student Ambassador | Université Paris-Est Créteil (UPEC)

01/01/2024

Selected to represent UPEC in the prestigious Aurora European University Alliance. Collaborated on international student projects with peers across Europe.

🏅 CERTIFICATES

- Certificate of Completion - SQL
- Certificate of Completion - SQL + Tableau
- Python Core - MySirG
- Certificate of Completion - Data Analysis with Excel Pivot Tables
- Certificate of completion - Introduction to Tableau
